

ASM Investigation Summary Report

Alert ID: 535791

Date: 2026-06-16T14:37:14.034Z

Alert Summary: SNMP Server at 114.94.16.0:161

Alert Severity: **High**

Alert Details

The Simple Network Management Protocol (SNMP) provides software version and configuration information for devices including routers, printers, switches, and other network devices. The information provided over SNMP can be particularly valuable to attackers, so devices should not respond to SNMP requests from the public Internet. This issue identifies SNMP V1 and V2.

Service Details

Field	Value
Service Type	SnmpServer
Service Name	SNMP Server at 114.94.16.0:161
Active Classifications	SnmpServer,CiscoIOSXE
Business Units	n/a
Provider	On Prem
IP Addresses	114.94.16.0
Port	161
Protocol	UDP
First Observed	2026-05-26
Last Observed	2026-06-16

Asset Details

Field	Value
Asset Name	114.94.16.0

Business Units	n/a
Asset Type	ResponsiveIP
Detected Services on Asset	SnmpServer
Associated IP Range	114.94.16.0 - 114.94.16.0
First Observed	2026-05-26
Last Observed	2026-06-16

Remediation Guidance

Remediation Taken

action	actiontimestamp	outcome	outcometimestamp
close service port from internet	2026-06-03T15:33:00.255Z	Success	2026-06-16T14:37:07.860170Z

Evidence and Investigation Artifacts

Service Owner Information

This section contains all potential service owners identified during the investigation.

name	email	source	timestamp
James Holden	jholden@expanse.co	ServiceNow	2026-06-03T15:33:20.891785Z

Data Collected from Owner

This section contains information on the data collection task completed in the playbook.

options	selected	answerer	timestamp
"What remediation action would you like to take?"	"Automated remediation by restricting open ports"	"aarias@paloaltonetworks.com"	2026-06-16T14:37:02.831559Z

Private IP Addresses

Any identified private IP addresses that are known to be related to the asset being investigated are recorded here.

source	ip
AWS	172.31.98.1

Cloud Asset Information

Any additional cloud details discovered during the investigation are lists in this section.

provider	organization	project	region	other
AWS			us-east1	us-east-1a

Object Tag Information

Any related tags or labels found in other IT/Security systems during the investigation are recorded here.

key	value	source
env	dev	AWS
purpose	testing	AWS
cost-center	rocinante	AWS

Related System Identifiers

This section contains any related system records from other IT/Security systems as well as links where available.
