

H

SNMP Server at 114.94.16.0:161

Alert Status:

In Progress

▼

ALERT POLICY DESCRIPTION

The Simple Network Management Protocol (SNMP) provides software version and configuration information for devices including routers, printers, switches, and other network devices. The information provided over SNMP can be particularly valuable to attackers, so devices should not respond to SNMP requests from the public Internet. This issue identifies SNMP V1 and V2.

ALERT EVIDENCE

First Observed	May 25 2026
Last Observed	Jun 19 2026
IPv4 Address	114.94.16.0 Associated with this IP: Alerts Services Websites
Port Number	161
Port Protocol	UDP

HOW TO REMEDIATE
